

# updated road safety resources — road sense kids: Preschool to Grade 10

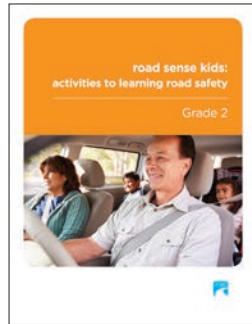

As part of our commitment to promoting a safer driving culture in British Columbia, ICBC has developed an updated road safety curriculum to help teachers give children and young adults the tools they need to be safer.

## We're never too young to learn about road safety

Knowing how to safely cross the street at a roundabout, navigate a safer walking route to school, or be a responsible passenger are foundational skills for all future British Columbians. [The ICBC Road Sense Kids resources](#) facilitate the development of these skills for children between Preschool and Grade 10.

The updated road safety resources incorporate the recent changes to the B.C. Ministry of Education's curriculum requirements, including:

- Incorporating Core Competencies, Big Ideas, and Learning Standards through the Know-Do-Understand model
- Focusing on personal safety, personal awareness, and personal/social responsibility
- Integrating the First Peoples Principles of Learning perspectives

## Teachers select content that is appropriate for the needs of their students

This material is intended to provide teachers with age-appropriate road safety content to augment the existing B.C. curriculum materials. Teachers choose the most relevant exercises and activities based on the needs of their students.

Access our complete catalogue of road safety resources online at:

## Road Sense Kids: Preschool to Grade 10

These road safety resources consist of cross-curricular learning plans that introduce students to the concept of traffic, being aware of traffic and being safe around traffic, and the importance of obeying traffic safety rules because they reduce the risk of injury.

The learning plans associated with each grade include age-appropriate activities that are provided as a separate activity book so that teachers may print or distribute these as needed.
