Mathematics with/in  
Community

**Fully online, part-time cohort**

Application deadline | March 21, 2022

Program start date | September 2022

## MEd in Mathematics Education

This MEd in Mathematics Education is a unique fully online graduate program that explores approaches for constructing and living mathematics curriculum that is responsive to place/land and connected to community. The program offers opportunities to study teaching and learning mathematics in diverse community contexts including:

- Teaching and learning gardens
- Cultural spaces
- Urban, rural and Indigenous communities
- Artistic performances
- Inside and outside school classrooms
- Family settings
- Public spaces such as libraries, malls, community centres
- Issues important to communities such as climate change, poverty, and social justice
